

Wilson Construction Intranet Project— Richard Wilde’s Video Script

Welcome to Wilson Construction’s new employee intranet. This new website now has many new improved features in response to your helpful suggestions.

(pause)

The “Bulletin” page now features updated company news and important announcements.

(pause)

An important addition to this site is the skill and safety training page. You will find study guides, online courses and certification tests. Of course, classroom and hands-on worksite training will always be necessary.

(in a sympathetic tone)

As we adopt this new training, we will end the tradition of Wilson’s all day safety seminars. We all know that these have been effective and popular seminars. However, your fellow workers chose this way of cost cutting, in order to keep our costly health insurance benefits.

(going upbeat)

The “Employee Service’s” page allows for sign-up of company sports activities and benefits. One can now, fill-out and change benefit forms online with secure password protection. Employees can share suggestions or opinions on the “forum”page. Finally, there is the fun page, called “The Water Cooler.” It features social news like birthdays, awards and interesting employee profiles.

(sincerely)

I would like to express my special gratitude to Jenny Myers for her tireless work managing this intranet project. I would like to also, express my thanks to all the employees of Wilson Construction for their suggestions that made this site a success.
